

An endangered animal

Name: axolotl

Habitat: lake of xochimilco

Country: Mexico

Appearance: broad round head, lidless eyes, short legs and a fin-like tail

Food: worm

Why it is endangered: loss of habitat and pollution

Number of animals today: 50 in Mexico

My endangered animal :

My favorite animal is the axolotl. The axolotl lives in the lake of xochimilco. They have broad round heads, lidless eyes, short legs and a fin-like tail. They eat worms. The axolotl **is** endangered because of loss of habitat and pollution. Axolotl lives in **Mexico**. There are only about 50 axolotls.
