

MY ENDANGERED ANIMAL

The whale shark

It is the bigger **fish** in the world
It's 12 meters **long**, and he
weighs 20 tons.

He can live up to 60 years.

His habitat **is** tropical waters in
the Philippines, for example.

They are ovoviviparous.

He eats plankton, algae,
crustaceans and small fish.

It has a peaceful temperament.

His meat, skins and his
cartilage is used for humanity.

For all this and pollution **it** is an
endangered animal.
