Country: Africa

Appearance: black fur

Food: leaves, stems and flowers

Why it is endangered:

1. Loss of habitat 2. Hunting and poaching

Number of animal today: 1,063 in the

world

Report: An endangered animal

My favourite endangered animal is the mountain gorilla. Mountain gorillas live in tropical forests. Their fur is black. They eat leaves, stems and flowers. They live in Africa. Mountain gorillas are endangered because of loss of habitat, poaching and

hunting baby gorillas to sell as exotic pets.
There are about 1,063 mountain gorillas
in the world
