Number of animals today: 1800 in the world

## Report: An endangered animal

My favourite endangered animal is the giant panda. Giant pandas live in the broadleaf and coniferous forests. They are white, black and the sole of the foot is pink. They eat bamboo, vegetables, little animals, fruits, fish and insects. The giant pandas live in groups. Giant pandas are endangered because of loss of habitat and pollution. They are mammals and carnivores. They are good tricksters and there are 1800 in the world today. I love giant pandas.
