

## PROJECT MOVIE PHONE:

*My invention it's about the movie phone. I chose this gadget because it is very useful and very intelligent. The mobile gave you many options: Call, send messages...*

*One of the first things that facilitated communication was writing.*

*After the writing were the diaries, and after the diaries was the radio. To finish, they arrived with TV and movie phones.*

*In 1923 put police reports in public phone booths.*

*In 1964 the United States had 1.5 million mobile phone,*

*In the 1960s, the Improved Mobile Telephone Service would offer a total of 44 channels per city.*

*When there were no mobile phone, they met with their friends, went to do other activities, they were on the street all day...*

*In 1973 Martin Cooper invented the smartphone,*

*Cooper was inspired to develop the mobile phone by watching Captain Kirk use his communicator in the Star Trek series.*

*Bell Labs introduced the idea of cellular communications in 1947,*

*There are many differences with the mobile phone before and now: Before, the cell phones did not have so many applications, they were older...*

*By June*
